1. What does your packaging say to your customers?

Visual components significantly impact consumer behavior, where colors and packaging are essential factors in buying choices. The understanding of these factors enables companies to strategically create products that draw in and hold onto customers. In this article, it will examine the impact of product design on consumer preferences and buying habits.

Numerous companies invest significant time (and resources) in creating and perfecting their packaging to please their customers. Conversely, firms hardly pay attention to their packaging (sometimes opting for simple, unbranded boxes).

Nonetheless, one aspect that both of these groups may frequently neglect is the influence of color on consumer psychology.

Even though psychologists have researched this topic for years, numerous brands fail to recognize advantages of thoughtfully choosing colors for their packaging and are oblivious to the "color wheel" that assists in this process.

Color can trigger emotions and sensations. Particular colors can appeal to certain groups or buyers in a market. It has the ability to draw attention. It can also assist in steering individuals

towards specific purchasing habits. The psychology of packaging colors affects all of this and beyond.

But what does each of the colors mean? And how do you choose the right color to market or product?

2. Psychology of color in packaging

In short, the different colors, when applied to packaging, correspond to the subsequent emotions, messages, and brand values:

- **Red:** Life force, boldness, living, passion, enthusiasm, love, power, power, action, enthusiasm, romance, suck.
- **Orange:** friendly, vibrant, self -confidence, wonderful, daring, comfortable, cheap, creative.
- **Yellow:** joy, glow, comfort, optimism, cheerfulness, energy, joy, confidence.
- **Green:** soothing, revival, development, calm, healthy, environmentally friendly.
- **Blue:** relaxation, reliable, efficiency, peace, logic, intelligence, reliability, strength, honesty.
- **Purple:** ambiguity, indulgence, greatness, purity, noble, perception, personality.
- **Turquoise:** Peace, cleanliness, openness.
- **Pink:** femininity, soothing, attraction, young, fun, affection.
- **Brown:** grounded, soothing, safety, organic.
- **Black:** elegance, premium, sophistication, straight, strength, mystery.
- **White:** simplicity, elegance, purity, innocence, good, humility, hygiene, new beginning, premium.
- **Gray:** calm, neutral, balanced.

Research suggests that **90%** of immediate evaluations of products rely solely on color, highlighting its significance in packaging and branding.

Orange is a vibrant and energetic color that conveys Enthusiasm & Excitement

Many claim that orange is a problematic color to work because it can express quite different emotions. Orange can sometimes reflect low costs or even budget products.

However, careful use of this color can cause friendship, fun, adventure and warm feelings. Orange is also suitable for use with opposite or complementary colors, allows for a well -balanced message.

Popular Brands: Fanta, Nickelodeon, Firefox, Quorn, B&Q

Industries: Food, beverage, DIY

Yellow color attracts attention and represents optimism, often used in impulse purchases.

Clean yellow packaging and brands are usually targeted to children and adolescents, yellow is often used in combination with a different color to make another message.

Packaging color psychology also sees yellow color that reflects originality, innovation, fun and happiness. The use is standard on products designed to reflect or reflect an energetic, confident brand.

Popular Brands: Shell, DHL, Ferrari, Subway, National Geographic, JCB

Industries: Delivery / fulfilment, construction, plant equipment, fast food

Green symbolizes health and sustainability, attracting eco-conscious consumers.

Green is one of the more important colors when used on packaging, but still a single that can express a wide range of emotions and emotions.

Green is often used to express environmentalism, purity and biological products. It is widely used with craft materials and natural colors to promote environmental benefits.

However, green bright colors are energetic, fresh and healthy. Dark blue grains are cool and relaxed, while soil green is popular for natural products and marks.

Popular Brands: Subway, Starbucks, BP, Land Rover, Waitrose, Lloyds Bank

Industries: Banking, medical, health and wellbeing, foods

Blue expresses trust and reliability, often used in economic and technological brands.

Blue is often seen as a "safe" color to use for your packaging - most preferred by both male and female consumers. It also refers to addiction, strength, harmony and intelligence, which is why the use is widespread among the technology countries. The unconscious message is blue that indicates the product or mark you can trust.

In addition, deep blues usually appeal to old consumers, attracting a small demographic with light and more vibrant blues.

Despite this, it may be a risk to use blue for the packaging. As expected to use blue color, due to its popularity, packages may lose in the middle of crowds with similar sighting products.

Popular Brands: HP, Gerben foods , Facebook, Oral B, Ford, Pfizer, Pepsi, Gillette, Samsung

Industries: Electronics, software, pharmaceuticals, and medicines

How does the packaging now act as a first impression of a product? To influence emotional and logical decisions. Important items include:

Forms and designs: Specific packaging styles grabbed the eye of shelves and promote brand awareness.

Texture: Environmentally friendly material attracts consumers who are conscious of rigor.

Fonts and views: Specific fonts and appeals of visual brands promote recognition and perceived value.

Perfect and practical: User friendly packaging increases the experience, increases the brands' loyalty.

In conclusion, Product design, which encompasses color psychology and packaging, greatly influences consumer behavior. Brands that effectively utilize colors and creative packaging designs can improve customer preferences, increase sales, and establish robust brand identities. Grasping these psychological factors enables companies to develop engaging visual marketing tactics that enhance consumer involvement and loyalty.
